Blue Flame

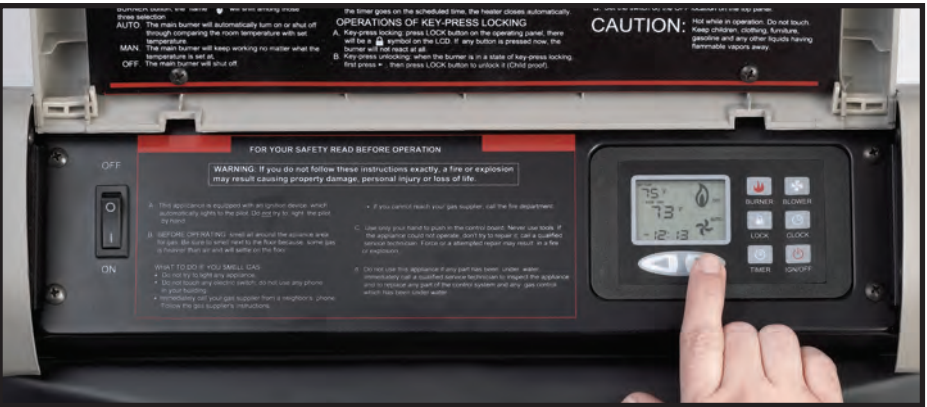

Model	Btu	Natural Gas / LP	Controls	Dimensions (H x W x D)	Weight (lb)
HB20EL	20,000	LP	Electronic	23 5/8 x 19 5/8 x 9	34
HB20EN	20,000	Nat	Electronic	23 5/8 x 19 5/8 x 9	34
HB30EL	30,000	LP	Electronic	23 5/8 x 27 1/16 x 9	41
HB30EN	30,000	Nat	Electronic	23 5/8 x 27 1/16 x 9	41

HearthRite is committed to continuous product improvement. Specifications are subject to change without notice.

All Touchpad Heaters include blower and stand.

Warranty

All Parts carry a 3-year limited warranty with a 3-year limited labor warranty.

Touch Pad Controls

Empire Comfort Systems is committed to continuous product improvement; specifications are subject to change without notice. Flame size, shape, and color will vary from photos.

Due to high temperatures, the appliance should be located out of traffic and away from furniture and draperies.

Children and adults should be alerted to the hazard of high surface temperature and should be kept away to avoid burns or clothing ignition.

Installation and repair should be done by a qualified service person.

When used without adequate combustion and ventilation air, heater may give off CARBON MONOXIDE, an odorless, poisonous gas.

These heaters have a pilot light safety system that turns the heater off if not enough fresh air is available. Do not tamper with this safety system. If the heater shuts off, do not re-light until you provide fresh air. If the heater keeps shutting off, have it serviced. Keep the burner and control compartment clean.

Carbon monoxide poisoning may lead to death. Early signs of carbon monoxide poisoning resemble the flu, with headache, dizziness, and/or nausea. If you have these signs, the heater may not be working properly. Get fresh air at once and have the heater serviced.

Some people—pregnant women, persons with heart or lung disease, anemia, those under the influence of alcohol, those at high altitudes—are more affected by carbon monoxide than others.

These heaters are design certified in accordance with American National Standards Institute Z21.11.2a (latest standard) by the Canadian Standards Association as Unvented Room Heaters.

The installation must conform to local codes. In the absence of local codes, the installation must conform with American National Standard (National Fuel Gas Code) known as NFPA 54 and ANSI Z223.1 (latest edition) available from the American National Standards Institute, Inc., 11 West 42nd St., New York, N.Y. 10036, or from the National Fire Protection Association, Batterymarch Park, Quincy, Massachusetts 02269.
