

Marley Engineered Products has introduced a new line to their ventilation products. The Air Hog line of portable air ventilators appeals to customers who wish to utilize an inexpensive means to ventilate manholes and other confined spaces, to provide fresh air, or remove fumes to increase worker safety and comfort.

The Air Hog line offers two sizes of blowers to accommodate a variety of applications and air flow requirements. The eight-inch Air Hog offers 1225 CFM of air movement, while the twelve-inch model has an airflow of 2450 CFM. The twelve-inch Air Hog also comes in a wet location version. All three blowers in the Air Hog line also feature single-switch control, as well as a contoured handle for ease of portability.
